

CQMS Razer to Deploy Gravity to Achieve End-to-End Supply Chain Visibility

Cloud platform enables global mining equipment and fixed plant products manufacturer to gain full visibility of their procurement to customer fulfilment supply chain.

MELBOURNE - October 24, 2017 - Gravity Supply Chain, the cloud-based supply chain platform, today announced that Australian-headquartered CQMS Razer will deploy the Gravity platform to support demand planning and improve supplier, shipment and inventory visibility.

A global company with operations in 13 countries and 5 continents, CQMS Razer manufactures and provides field-life management of large surface mining equipment, fixed plant product, wear parts and productivity technology. With the Gravity cloud-based platform CQMS Razer will connect all of their trading partners on a single network to accelerate the timely delivery of their products, reduce inventory and improve customer service levels.

Using Gravity CQMS Razer will gain for the first time real time visibility over their procurement to customer fulfilment supply chain with the goal of improving their ability to match demand and supply. Other expected benefits include - improved inventory and allocations, and the ability to allow customer to view progress of sales order on-demand.

The deployment of the Gravity platform will include:

- Automatic data exchange with CQMS Razer's global logistics partners for key shipment information.
- External data feeds that the platform has with many global ports, customs regimes, shipping lines and hauliers.

"Connecting all trading partners on a single network will provide essential visibility into inventory and progress of purchase and sales orders. This will help CQMS Razer better serve their customers." said Darren Palfrey, COO, Gravity Supply Chain. "We are delighted to be partnering with a world leader in their industry, and working with CQMS to embrace its supply chain as a competitive advantage. Our cloud-based platform will provide connectivity between internal and external stakeholders, supporting their customer promise whilst minimizing costs and risk."

About Gravity Supply Chain

Gravity Supply Chain Solutions, voted one of the Top Logistics Technology Companies in 2017, provides managers with real-time visibility over their global end-to-end supply chains so they can be more proactive and effective in reducing costs and identifying issues that will impact customer service levels. Gravity accelerates and streamlines the collection, analysis, and sharing of real-time data to improve collaboration and decision-making among all supply chain partners anytime, anywhere.

Gravity uses Web APIs, AI Bots and proprietary algorithms to unlock and gather data scattered across not just an organization's immediate supply chain, but throughout the multiple tiers that support it. It also collects what is happening out in the world - including the latest weather, labor strikes, the impact of natural disasters, providing you with instant awareness of potential supply chain disruptions.
